Page 1 of the specification, before the first sentence, insert the following

– This application claims the benefit of 60/429780, filed on 11-27-2002 --.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

Claims 1-27 are allowed.

Babler (6090196, PTO-1449) discloses a process of making beta quinacridone by oxidation of 6,13-dihydroquinacridone with hydrogen peroxide in the presence of a catalyst, a particle growth inhibitor and a base in a liquid phase. Babler's process, however, does not involve the instant polyvinyl pyrrolidone.

Polyvinyl pyrrolidone has been known to be a catalyst in the manufacture of hydroperoxides of aryl compounds, such as cyclohexyl benzene, by oxidation employing molecular oxygen (Velenyi, 4293719, PTO-1449, columns 2-3) or as a stripping agent in the presence of an alkaline reducing agent to remove vat dye from the cotton or regenerated cellulose fibres (GB 735396, PTO-1449, page 1, lines 85-90). Absent is the motivation to include polyvinyl pyrrolidone as described by Velenyi or GB 735396 in the process of Babler to arrive at the instant invention.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
